

Voltage Range: 12 or 24V

Warranty: 5 years

LR12: 50watt 6Ω

LR24: 50watt 24Ω

The dummy load resistor is designed to be used on vehicles that have electronic components that are not LED compatible. The use of an optional load resistor simulates the current draw used by a standard direction indicator bulb and enables the flasher unit to operate correctly.

LOAD RESISTOR

LR12 12V

LOAD RESISTOR

LR24 24V

Important Notice:

Must be mounted on metal surfaces. The resistor can reach up to 170°C, do not mount the resistor on any surface that can melt by the heat of the resistor, this includes plastics, hoses or painted surfaces.

Correct Fitting:

Using the cable terminals supplied ensure that when the wires are connected they provide a completely waterproof connection to ensure safe operation of the vehicle. Make sure the load resistor is secured firmly to an appropriate surface by using the screws provided. If in doubt of the correct fitting procedure of this product please consult a qualified automotive electrician.
